

Bellamoli

Edition 10.0

www.bellamoli.it

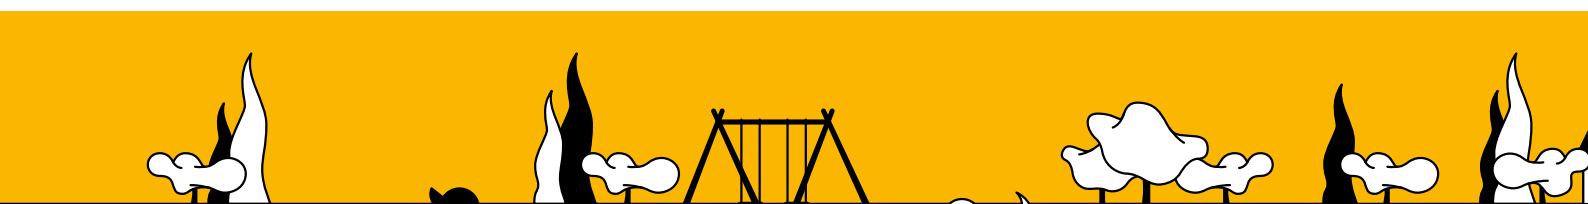

Una storia racchiusa in una pietra

Nel 1927 abbiamo iniziato le prime estrazioni dalle cave.
Oggi sono di nostra proprietà e ne curiamo direttamente l'estrazione del materiale,
a garanzia di una continua disponibilità e costanza cromatica del prodotto trasformato.

A story contained in a stone

Bellamoli's first marble extraction is dated 1927, from the same quarries that are now owned
by the company. Directly quarrying most of the materials ensures continuous availability and
consistency of colors in the processed products.

The images represent the material in actual size

Granulati | Chips

Ciottoli | Pebbles

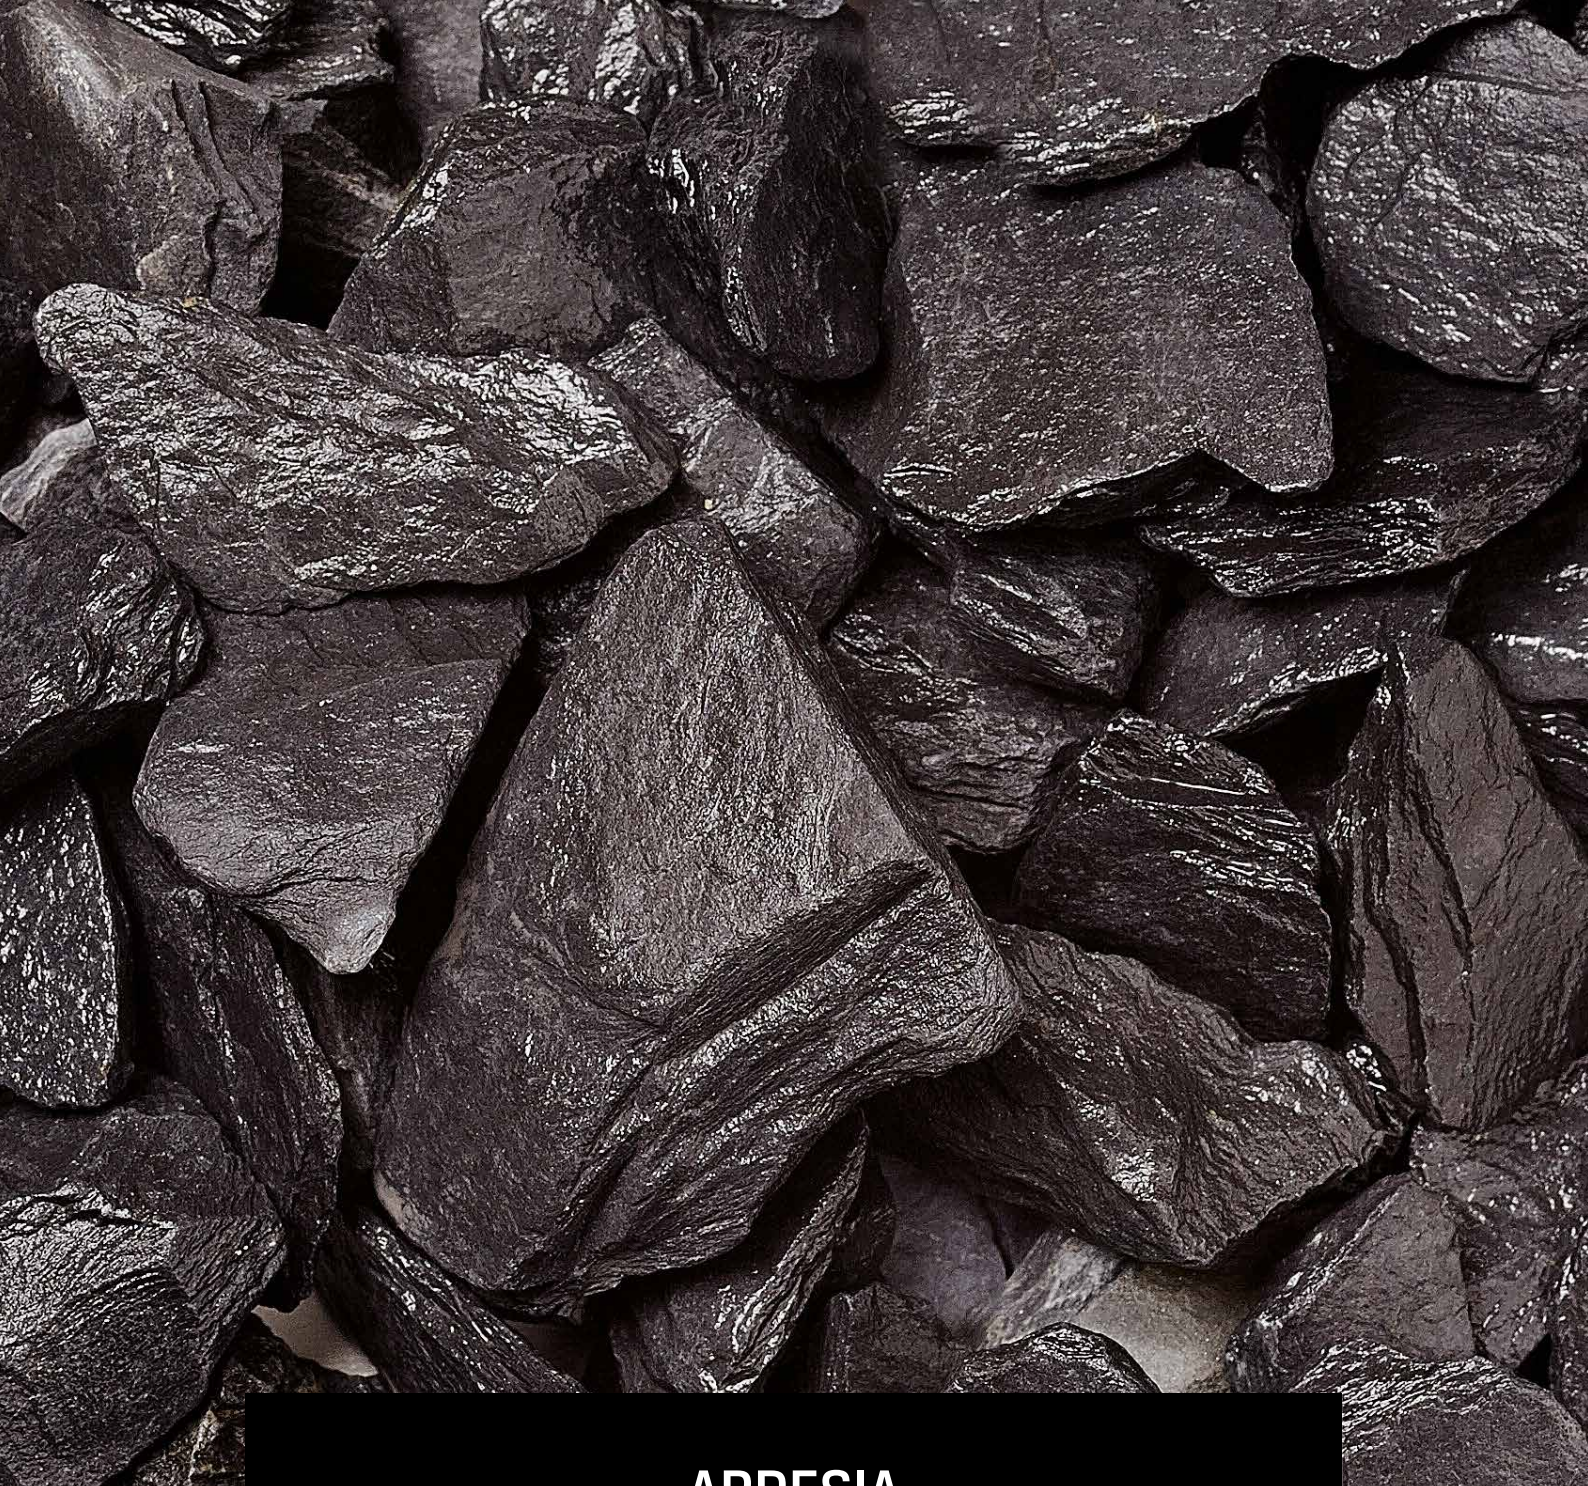

GRANULATI

La nostra produzione di granulati di marmo è tra le più complete. Essa racchiude quasi tutti i colori e le tipologie di materiali italiani presenti in natura, nonché un ventaglio di granulometrie molto ampio.

CHIPS

An extensive selection of decorative chips and pebbles is available in a variety of colors and sizes. Our stone are produced to the highest quality and are naturally sourced. They are well suited for landscaping, decoration and terrazzo.

ARDESIA

	8/9	Rinfusa Bulk
	8/9	Big Bag da 1.5 ton a perdere - incluso imballaggio 1.5 big bag packaging included
	8/9	Sacchi nylon da 25 kg - 40 sacchi per paletta (Epal) - 1.0 ton 25kg bag - 40 bags / pal (Epal) included - 1.0t
	8/9	Cesta metallica da 0.6 ton - incluso imballaggio 0.6T metal cage - packaging included
	8/9	Cesta metallica da 1.2 ton - incluso imballaggio 1.2T metal cage - packaging included

BIANCO CARRARA

prima scelta | 1^o choix

	000, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10	Rinfusa Bulk
	000, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10	Big Bag da 1.5 ton a perdere - incluso imballaggio 1.5 big bag packaging included
	000, 0, 1, 2, 3, 4, 5, 6, 7	Sacchi nylon da 10 kg - 100 sacchi per paletta (Epal) - 1.0 ton 10kg bag - 100 bags / pal (Epal) included - 1.0t
	000, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9	Sacchi nylon da 25 kg - 40 sacchi per paletta (Epal) - 1.0 ton 25kg bag - 40 bags / pal (Epal) included - 1.0t
	2, 3, 4, 5, 6, 7, 8, 9, 10	Cesta metallica da 0.6 ton - incluso imballaggio 0.6T metal cage - packaging included
	2, 3, 4, 5, 6, 7, 8, 9, 10	Cesta metallica da 1.2 ton - incluso imballaggio 1.2T metal cage - packaging included

WOODSTONE

11/30, 30/90 mm

Sacchi nylon da 25 kg - 40 sacchi per paletta (Epal) - 1.0 ton
25kg bag - 40 bags / pal (Epal) included - 1.0t

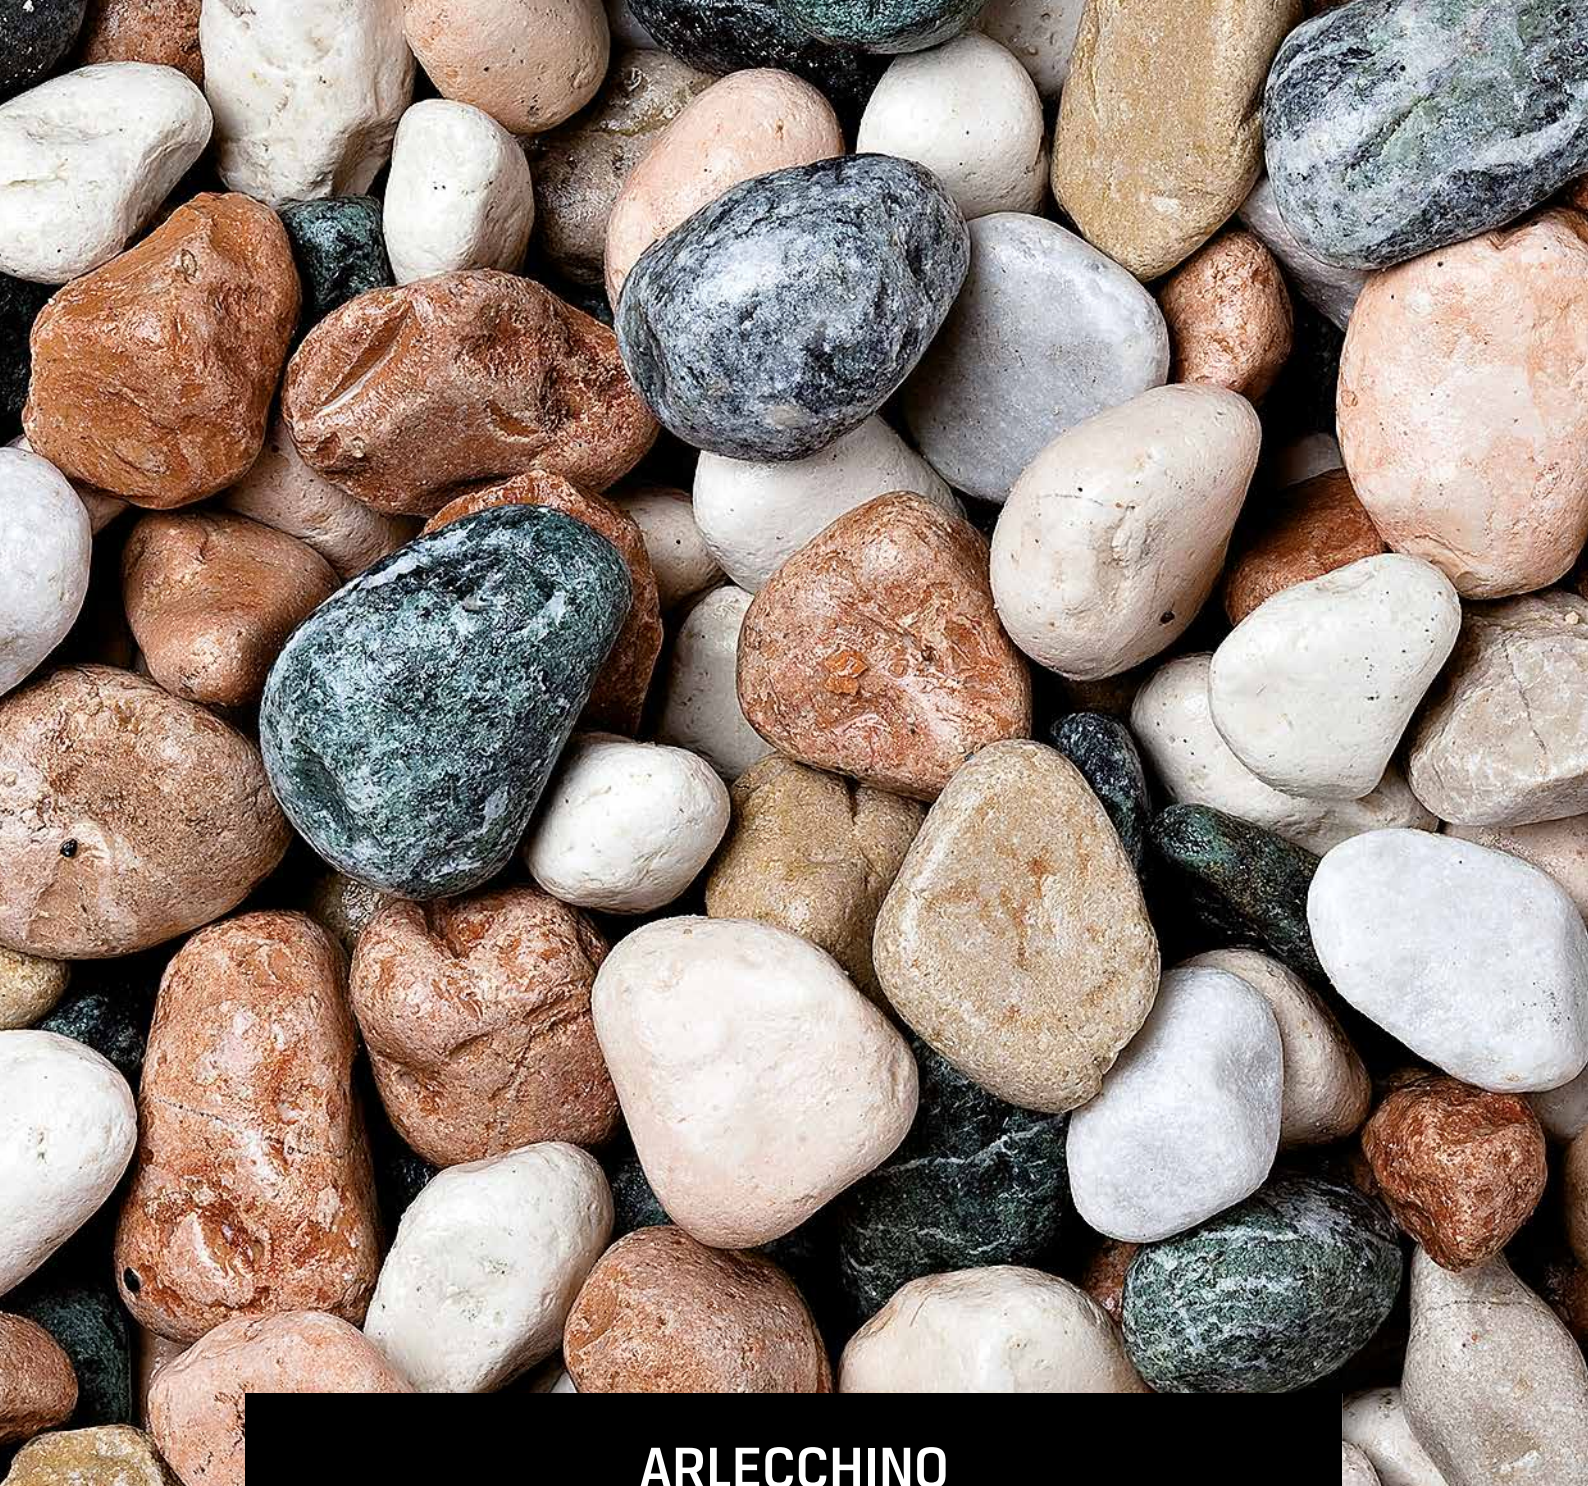

CIOTTOLI

La nostra gamma di ciottoli di marmo è composta dalle pietre idonee alla lavorazione di arrotondamento e levigatura della superficie, che avviene attraverso un'azione meccanica del materiale con l'acqua.

PEBBLES

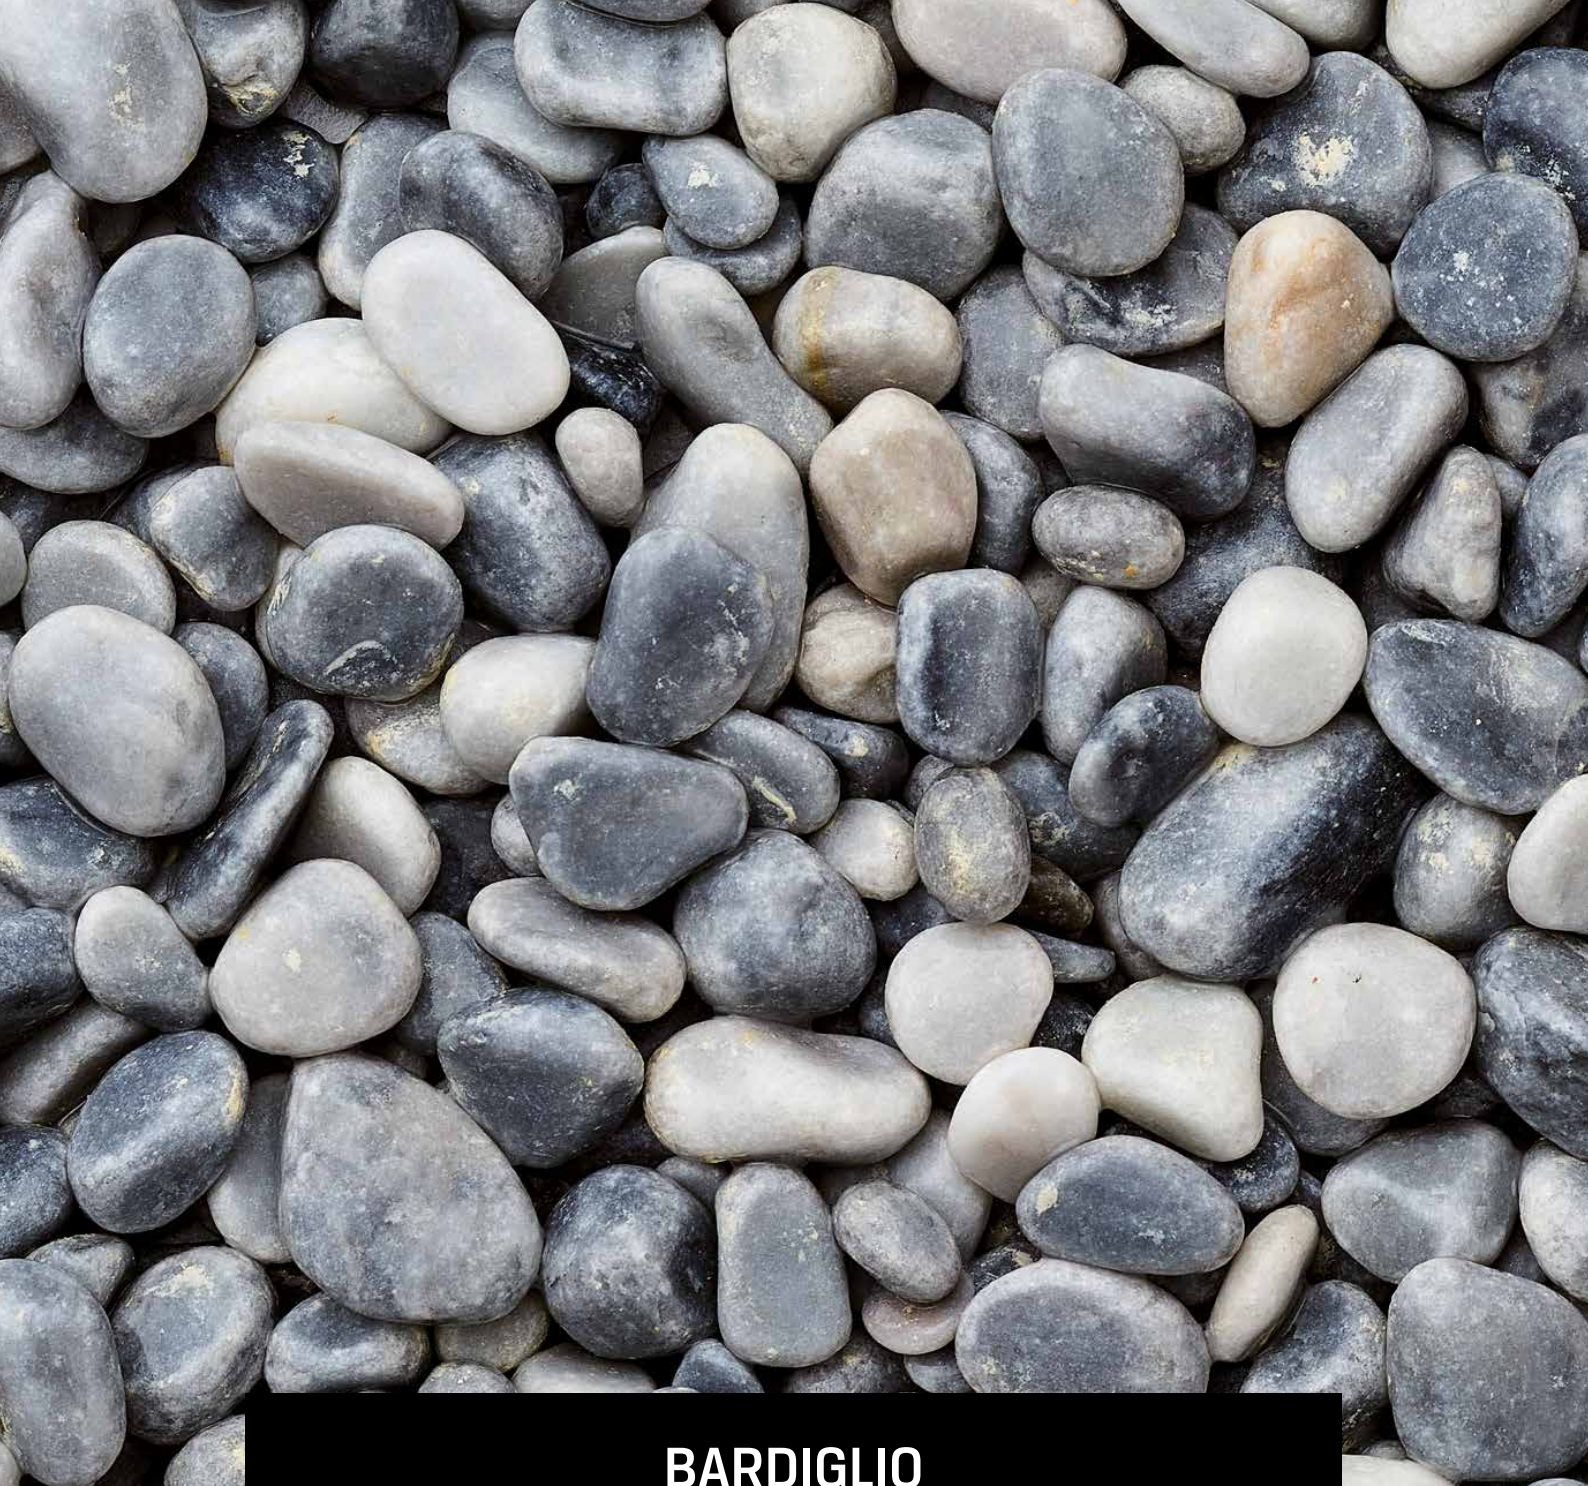

Our range of pebbles is made from stones suitable for rounding and polishing of the surface, which consists in a mechanical forced friction aided by water.

An aerial photograph of a large construction or industrial site. The top portion shows a vast area covered with a grid of rebar or similar structural elements. Below this, there are several large piles of sand or light-colored material. In the center, there's a large black rectangular area containing text. To the left of this area, there are stacks of materials, possibly bags of cement or similar, and some small structures. To the right, there are more piles of material, some of which appear to be dark, possibly gravel or crushed stone. At the bottom, there's a dirt road or path with some vehicles and more material piles. The overall scene suggests a busy construction or material processing site.

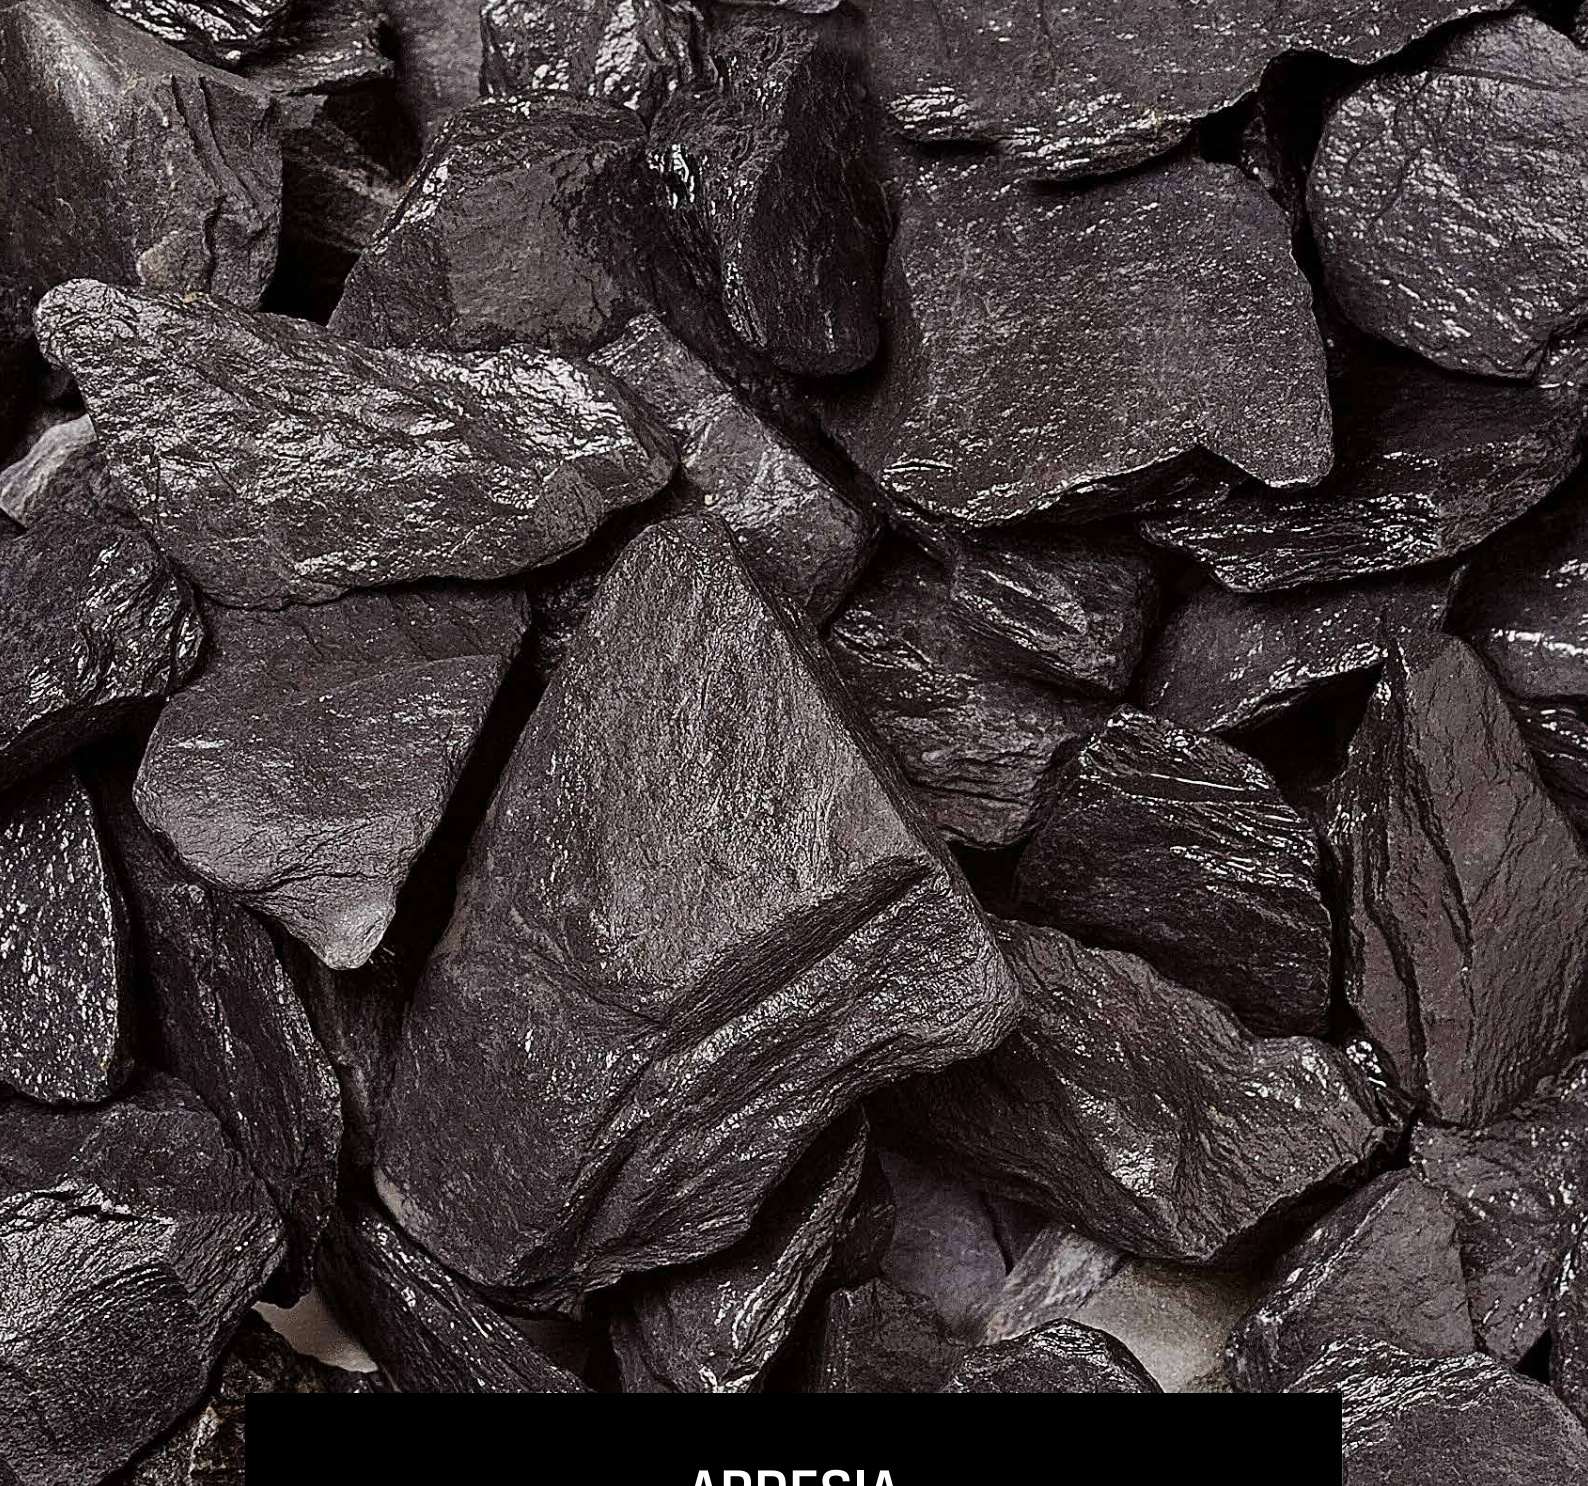

**MATERIALI DISPONIBILI

**MATERIALS AVAILABLE
FROM WORK ALA (TN)**

An aerial photograph of a construction site in Ala, TN. The foreground shows a large, flat area with several large piles of sand and gravel, and numerous stacks of white bags, likely cement or lime. A small yellow building is visible near the center. The middle ground features a large area covered with a dense grid of wooden stakes or rebar, possibly for a foundation or retaining wall. In the background, a small village is nestled at the foot of a massive, rugged mountain with exposed rock faces. The sky is clear and blue.

MATTONCINI LISTELLI E LASTRE

La nuova linea di prodotti si compone di due sezioni. La prima raggruppa piccole/medie pietre per la realizzazione di bordure e muretti; nella seconda, invece, si trovano lastre più grandi per la realizzazione di camminamenti e percorsi calpestabili.

SMALL BRICKS AND SLABS FOR WALKWAYS

The new product line consists of two sections.
The first grouping small/medium stones for the construction of borders and walls; the second one larger slabs for the construction of walkways and walkable paths.

The image features a black background with two vertical decorative borders. The left border consists of two parallel strips of small, multi-colored stones in shades of red, orange, yellow, and purple. The right border is a single strip of translucent, multi-colored glass chips in shades of green, yellow, and orange. Both borders are separated from the central text area by thin white lines.

VETRI E PIETRE ORNAMENTALI

Completano la gamma di granulati e ciottoli
una selezione di vetri e pietre particolari ideali
per arricchire i vostri progetti.

GLASS AND ORNAMENTAL STONES

Ornamental stones can be used to enrich landscape designs
like walkways, ponds or any kind of creative ideas you can think
of. We offer a wide a range of ornamental stones and glasses to
make your projects stand out.

VETRO TRASPARENTE

CIOTTOLINI

Questa selezione di ciottolini dà la possibilità di scegliere tra un'ampia gamma di colorazioni per l'applicazione nell'architettura della pavimentazione, garantendo la granulometria e la lavorazione ideale per le superfici calpestabili. Lavati ed asciugati i ciottolini possono essere impiegati, con l'uso delle resine, per pavimentazioni continue e drenanti.

PEBBLES

This selection of pebbles gives the possibility to choose between a wide range of colors in the ideal sizes for architectural uses like flooring. This washed and dried pebbles are well suited for mixing with resins in interior or exterior resin flooring applications.

Quba Stone

Quba Stone è un sistema modulare di gabbie zincate pensato per costruire muri a secco, auto portanti, pronti da mettere in posa e facili da spostare.
La loro messa in opera è facile e rapida, poiché è necessaria solo una gru per la posa.

Applicazione

Rappresenta un sistema perfetto per alzare muri di contenimento, recinzioni, terrazzamenti e terrapieni, arredo giardini e arredo urbano, paesaggistica, architettura permanente e temporanea.

Durata e stabilità

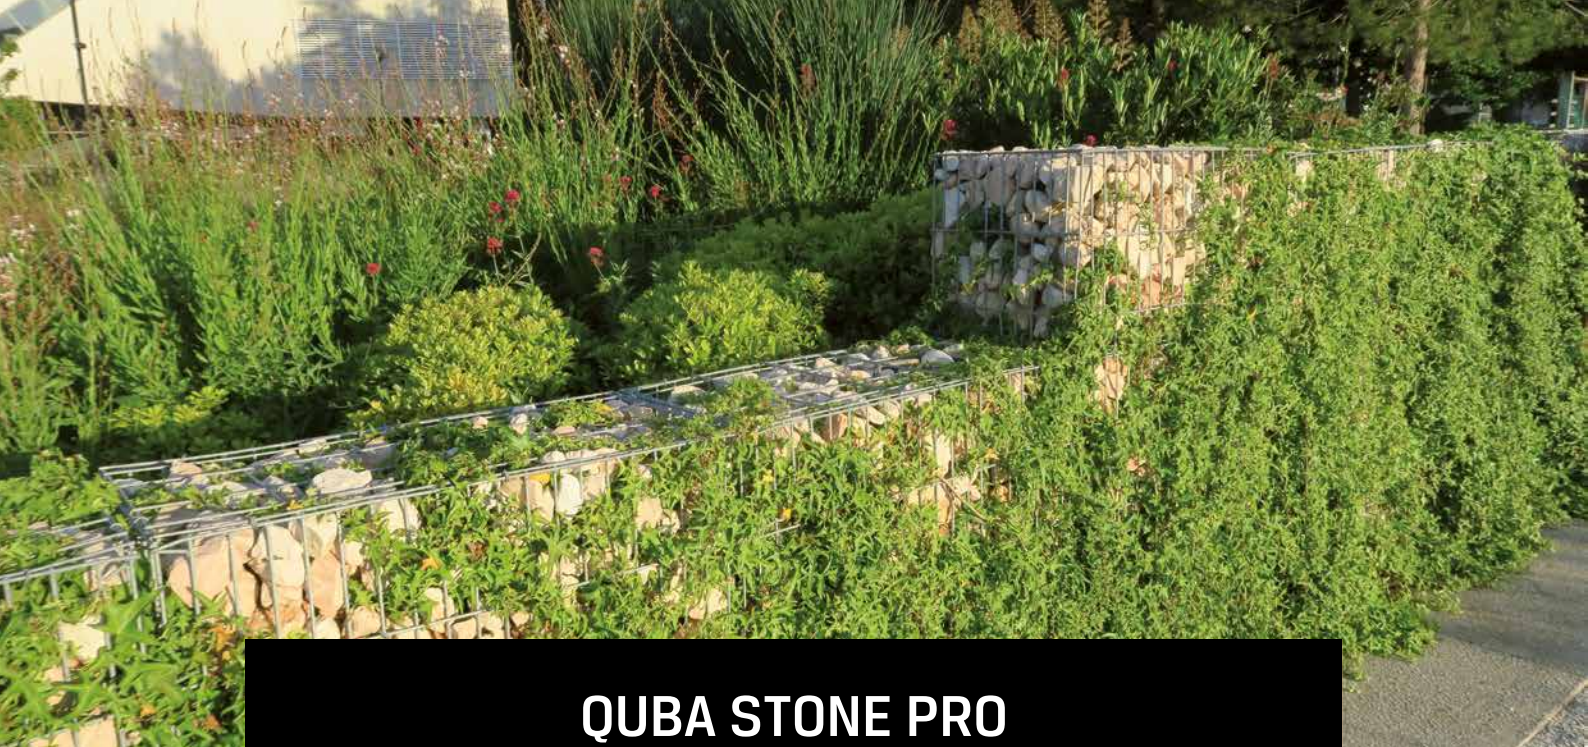

Ogni gabbia ha una struttura saldata e rinforzata con tiranti interni.
Il tondino in acciaio è spesso mm 6, e la zincatura è pari a 500 g/mq.
Il sistema brevettato e garantito Rawe rispetta pienamente le normative europee.

Montaggio

Quba Stone viene fornito pronto per la posa semplice e veloce, poiché ogni gabbia possiede un gancio per il trasporto per facilitare la sua movimentazione, rimozione e riutilizzazione anche dopo lunghi periodi.

Quba Slim

Quba Slim è il nuovo sistema di gabbie più sottili, dello spessore di soli cm 20, che permette la realizzazione veloce di recinzioni a secco dal design elegante.

La loro messa in opera è facile e rapida, poiché l'assemblaggio è stato pensato apposta affinché venga realizzato a mano senza ricorrere a macchinari per la movimentazione.

Applicazione

Questo tipo di soluzione si può utilizzare nella progettazione di recinzioni per l'arredo giardino e urbano, per progetti di paesaggistica e di architettura permanente o temporanea, nonché per giardini verticali e separé con cancelletti per il passaggio pedonale. Si possono inoltre creare giochi di altezze, superfici continue e omogenee, personalizzando totalmente colori, forme e rapporti tra pieni e vuoti.

Descrizione

Tutti i componenti che formano la gabbia sono zincati a caldo e le misure disponibili sono tre:

- altezza mt 1,00 o mt 1,40 o mt 1,80;
- lunghezza massima della rete di mt 2,5.

Durata e stabilità

Questo tipo di recinzione è costituita da profili di ancoraggio da fissare con tasselli a superfici in calcestruzzo, e profili sagomati per sostenere le reti metalliche zincate.

La maglia della rete misura cm 5x20 con doppio tondino rinforzato da mm 8 in senso orizzontale e filo singolo da mm 6 in senso verticale.

Montaggio

Forniamo i pezzi singolarmente, per lasciare la totale personalizzazione delle misure e dei colori.

La gabbia si prepara svolgendo 3 semplici azioni:

- ❶ montaggio dei componenti di Quba Slim: rete metallica, coperchio, profili laterali e supporti di ancoraggio, distanziali, viti, bulloni e tasselli;
- ❷ posizionamento della gabbia in base agli spazi disponibili;
- ❸ riempimento con granulati o ciottoli di diverso tipo scelti tra la nostra gamma cromatica.
